Some students have responded negatively to Menlo's COVID-19 vaccination requirement, which mandates that all students must be fully vaccinated by Oct. 31. However, the requirement, released on Aug. 25, has led to some students now getting vaccinated, despite previous

hesitations.

Menlo is implementing the requirement because of the U.S. Food & Drug Administration's official approval of the Pfizer-BioNTech COVID-19 vaccine for ages 16 and older. According to the Federal Bureau of Investigation's news release on

the approving of the COVID-19 vaccine, "The public and medical community can be confident that although we approved this vaccine expeditiously, it was fully in keeping with our existing high standards for vaccines in the U.S."

The names of the interviewed students

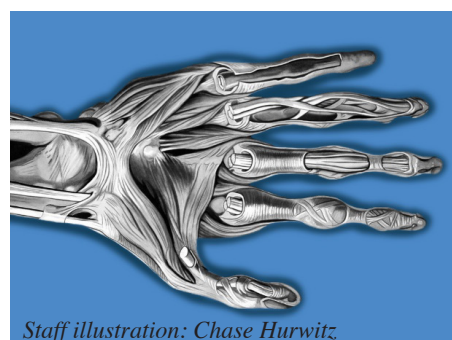

are altered to avoid tangible harm to them. The Coat of Arms recognizes the sensitivity of this topic and respects the decision of the other students who chose not to be interviewed.
