

WELDING: like sewing with fire!

Customer is allowed to have objects outside of the margin.

TRIM LINE TRIM LINE

TRIM LINE

Kade Mitchell (10) works on his 7018 vertical uphill overlap pad—an intermediate weld. Underneath the helmet sweat poured down his face from the extreme temperatures of SMAW welding, which can reach up to 50,000 degrees Fahrenheit. It takes a lot of concentration, patience, and a strong steady hand to weld consistently with good form.
